We are proud to present INFINITY, a new line of Decorative Laminate Veneer products bringing you the latest looks, styles and designs using cost-effective, state-of-the-art materials. This exciting offering includes several of the hottest new contemporary linear grains and textures in stylish modern, transitional and traditional designs. With something for everyone, INFINITY includes six distinctive door designs and 11 modern colors, including three textures and unmatched durability to easily withstand everyday wear and tear brought on by today's hectic lifestyles.

Environmentally Friendly -

INFINITY doors are considered to be *"green products"* with no formaldehyde off-gassing from assembled doors and drawer fronts. INFINITY substrates are made from 100% reclaimed and recycled materials, qualifying for 3 - 5 LEED points and are CARB2 compliant.

Anti-bacterial -

INFINITY DLV products feature an *anti-microbial additive* that lasts over the lifetime of the product, inhibiting the growth of bacteria, yeast, mold and mildew. This anti-microbial protection makes INFINITY products the perfect choice for residential, medical, scholastic, hospitality and governmental environments.

Color Fast -

INFINITY products resist the fading and darkening commonly seen with wood finishes. You can expect the highest degree of color fastness and consistency.

Five-Piece Construction -

Realistic textures and grain patterns combine with stile and rail construction to provide the overall look and feel of real wood doors.

Textures -

INFINITY products offer a variety of grain textures including smooth, medium and high. Smooth (S) is a satin texture. Medium (M) texture has a genuine wood grain feel emossed in the surface. High (H) texture is accomplished using a revolutionary new process that creates an extraordinary look that has recently become popular in Europe.

Accessories -

INFINITY offers a complete line of moldings and accessories to compliment your design.
